Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

D1 (D1= Wo 98/28278) discloses the use of 5-substituted-alkyaminopyrazoles (see D1, reference examples 3 and 14) as intermediates for preparing the corresponding oxime derivatives. The 5-substituted-alkyaminopyrazoles described in D1 differ from the compounds of present claims 5 and 6 in the nature of the substituent R5 or R6. Thus the subject-matter of claims 1-9 is novel vis-à-vis D1 (Article 33(2) PCT).

D1 teaches the insecticidal properties of oxime derivatives of 1-arylpyrazoles. Given the teaching of D1, the problem underlying the present invention may be seen as that of providing further compounds suitable for the control of parasites. Although the compounds of reference examples 3 and 14 are structurally close to alkylaminepyrazoles used in the present application, they are used only as intermediates in the preparation of the corresponding oximes and there is no indication of any parasiticidal property. Thus the parasiticidal properties of the compounds of formula(I) were not predictable and the subject-matter of claims 1-9 can be considered as being inventive (Article 33(3) PCT).

The subject-matter of claims 1-9 is considered to be industrially applicable and the present application is therefore considered to satisfy the criterion set forth in Article 33(4) PCT.
